Measured useful throughput (tx/s)
Raptr: 99.2 tx/s · median 0.455 s
Delugi: 99.1 tx/s · median 0.527 s
Raptr: 92.9 tx/s · median 3.139 s
Delugi: 50.4 tx/s · median ≥24.796 s
4 replicas · 1 B useful tx · Δ = 1000 ms · 20 Mbps egress · natural WAN
One input rate: 100 tx/s · 60 s per run · ≤ 15 s drain
Points: median; whiskers: p95; arrows: censored lower bounds. One run per case. Logarithmic latency axis.
Delugi / silent first leader: 2,082/6,000 unfinished at collection
